PHILOSOPHY

Chair: Joel Martinez
Administrative Coordinator: Claire Kodachi

Philosophy is the critical examination of our most fundamental ideas about ourselves and the world. Who are we? What can we know? How should we treat each other? What kind of society is best? What is our relation to the natural world? As individuals and as a culture, we have views on these questions even if we don’t talk about them. These beliefs and values influence the way we live, personally and socially. Philosophy tries to make these ideas evident and open to reconsideration, hoping thereby to improve human and nonhuman life on this planet.

To further those goals, philosophers often attempt to clarify and examine the basic assumptions and methods of other disciplines. Religion, the natural and social sciences, business, economics, literature, art, and education are examples of fields of study about which philosophical questions can be raised.

Resources for Nonmajors

Because philosophy is a basic discipline in the liberal arts, every well-educated person should have engaged with it. All courses in philosophy are open to nonmajors, and very few have extensive prerequisites. However, some advanced courses may be of greater benefit to students who have done previous work in the department.

Students majoring in other disciplines will find courses that probe the philosophical foundations of their major areas of study. These are courses pertaining to mathematics, biology, psychology, arts, politics, social theory, and the relations between science and religion.

The 100- and 200-level courses are all introductory courses designed for students beginning the study of philosophy. The 100-level entry-point courses introduce students to philosophy through its main issues: good reasoning, values, reality, and knowledge. The 200-level entry-point courses introduce students to philosophy through the consideration of philosophical questions about major human concerns that arise in religion, science, art and literature, and law. The 300-level courses in the history of philosophy demand substantial reading and are open to anyone who has taken one of the introductory courses. The 300-level courses in the themes in philosophy sequence build on students’ previous work in the history of philosophy and in introductory courses and introduce them to current work in metaphysics, epistemology, philosophy of language, philosophy of mind, ethical theory, and the philosophy of science. The 400-level Philosophical Studies Program courses undertake more advanced study of important philosophers, past and present, and of philosophical fields, problems, and methods.

Philosophical Studies

The Philosophical Studies Program consists of advanced courses concerning important philosophers past and present, central problems, major fields of philosophy, and/or philosophical methods. Course content is determined from year to year by the faculty with student input. These courses may be taken more than once for credit unless on the same specific topic. Consult the course listings for current offerings.

The Major Program

Students major in philosophy for many reasons, and the requirements are flexible enough to accommodate different kinds of interests in philosophy. Most majors are interested in philosophical questions for personal reasons—because they wish to explore questions about what is real and what is valuable, or questions about political ideals, in order to make sense of their lives. Some majors, however, hope to pursue philosophy as a profession. This means preparing for graduate work. Because of the many connections between philosophy and other disciplines, students often make philosophy part of a double major, combining it with areas such as political science, biology, psychology, religious studies, English, or economics. Philosophy is an excellent preparation for further study in almost any field. In fact, philosophy majors’ scores on the GRE and LSAT are among the highest of any major.

The Philosophical Studies Program of 400-level courses is determined by the developing interests of the faculty and is responsive to student interests. These courses enable juniors and seniors to do more advanced work in seminar settings in which students contribute significantly to the work of the class. The topics include the study of major thinkers of the past and present and of philosophical fields, problems, and methods.

Every semester the department offers a series of colloquia in which students can hear and discuss papers of visiting philosophers, philosophy faculty, faculty from other departments at Lewis & Clark, and fellow philosophy students.

Students interested in majoring or minoring in philosophy should consult as soon as possible with a member of the department and work closely with a faculty advisor to plan a program. Those interested in graduate school should make a special effort to become familiar with traditional questions, philosophical themes, and major figures and movements.

Major Requirements
